#### Welcome to our newsletter!

We are happy to have you on board for the Teachers 4.0 Digital project that aims to empower teachers in primary and secondary schools across Europe to promote digital [media] literacy and to tackle disinformation in their classrooms.

Interested in staying in touch with us for future news, events and learning opportunities? [Subscribe to our newsletter](#) and follow us on [LinkedIn](#), [Facebook](#), [Instagram](#)!

#### What is Teachers 4.0 Digital?

Digital literacy and tackling disinformation are among the top three digital skills needed for the 21st century. Teachers need to be equipped with the necessary knowledge and skills to empower their students to think critically, make informed choices online and stay safe whilst continuously building their resilience in the digital world.

**Teachers 4.0 Digital Age: Tackling Disinformation and Promoting Digital Literacy through Education and Training in European Classrooms** offers a large-scale capacity-building implementation for initial training and continuous professional development of teachers and educators across Europe with focus on Bulgaria, Cyprus, Greece, Italy, Poland and Romania.

#### Stay tuned for our large-scale capacity-building programme!

Launched by 1 December 2023 to run for three years, **Teachers 4.0 Digital** project will:

- **Develop a comprehensive curriculum** for teachers and educators
- **Design a University Course** on the topic of combating disinformation and digital [media] literacy for initial teacher education
- **Develop an e-Learning platform** for the upskilling of thousands of primary and secondary school education teachers and educators that will offer the Teachers 4.0 Digital course in a blended learning format.

#### We just launched our curriculum development!

The Teachers 4.0 Digital partners have just launched the development of a comprehensive **educational curriculum** and the design of a **University Course** intended for pre-service teachers and educators.

The University of Palermo (UNIPA) is leading the development of the curriculum with the support of the project partners who will be busy with compiling content and resources during the next couple of months for the modules covering a wide range of topics from teaching and learning in the digital school environment to digital [media] literacy competencies and disinformation.

The curriculum will provide practical examples of lesson plans, assessment and evaluation, while also offering a glossary on key terminology and compilation of resources that teachers and educators can use in their teaching.

[Read more on the modules here](#)

#### Meet our partners!

Our project consortium consists of 16 organisations from Belgium, Bulgaria, Cyprus, Greece, Italy, Poland and Romania.
